— ABOUT COURSE

CISSP

Certified Information Systems Security Professional

The CISSP Certification Program is an advanced enterprise cybersecurity training designed for professionals who want to master security leadership, enterprise architecture, governance, and risk management across large-scale organizations. This program follows the globally recognized ISC2 CISSP framework and prepares candidates for real-world security leadership responsibilities.

This program equips professionals with the expertise required to design secure enterprise infrastructures, implement security controls, manage organizational risks, and lead security operations teams in complex business environments. You will gain practical exposure to enterprise security architecture, access control systems, incident response management, cloud security, and modern threat mitigation strategies.

With a curriculum spanning all 8 CISSP domains including Security & Risk Management, Asset Security, Security Architecture, Network Security, IAM, Security Assessment, Security Operations, and Software Development Security, this is one of the most comprehensive CISSP preparation programs available for cybersecurity leaders and security architects.

CISSP Domain Coverage

Security & Risk Management

15%

Asset Security

10%

Security Architecture & Engineering

13%

Communication & Network Security

13%

Identity & Access Management

13%

Security Assessment & Testing

12%

Security Operations

13%

Software Development Security

11%

CyberHunt

Target Audience

- ✓ Security Analysts
- ✓ Ethical Hackers
- ✓ System Administrators
- ✓ Network Administrators
- ✓ Network and Security Engineers
- ✓ Cyber Security Managers
- ✓ Information Security Auditors
- ✓ Security Professionals

Pre-Requisites

- ✓ Basic understanding of network essentials and core concepts, including server and network components.

CyberHunt

Course Curriculum

Comprehensive syllabus mapped directly to the ISC2 CBK

01

Security Governance & Leadership

- Governance Frameworks (COBIT, ISO 27001)
- Strategy & Business Alignment
- Legal, Regulatory & Compliance Management
- Security Policies, Standards & Procedures
- Organizational Structure & Roles
- Ethics, Culture & Security Awareness

Practical: Develop a Security Governance Charter & Policy Framework.

02

Information Risk Management

- Risk Identification & Valuation
- Qualitative & Quantitative Risk Analysis
- Risk Appetite, Tolerance & Metrics
- Risk Treatment & Mitigation Strategies
- Third-Party & Supply Chain Risk
- Business Impact Analysis (BIA)

Practical: Conduct an Enterprise Risk Assessment & Risk Treatment Planning.

03

Security Program Development & Management

- Security Program Lifecycle
- Security Strategy & Roadmapping
- Resource Planning & Budgeting
- Security Metrics, KPIs & KRIs
- Vendor & Partner Security Oversight
- Training, Awareness & Culture Building

Practical: Build a 1-Year Security Roadmap & Budget Plan.

04

Incident Management & Business Resilience

- Incident Response Lifecycle (NIST/ISO)
- Incident Classification & Escalation
- Forensics & Root Cause Analysis
- Business Continuity & DR Integration
- Crisis Communication & Stakeholder Mgmt
- Post-Incident Review & Lessons Learned

Practical: Conduct a Ransomware Tabletop Exercise & Executive Incident Report.

05

Information Asset Management

- Asset Identification & Classification
- Data Ownership & Accountability
- Information Lifecycle Management
- Data Protection & Privacy Compliance
- Secure Storage, Handling & Disposal
- Cloud & Hybrid Asset Management

Practical: Perform Data Classification & Asset Inventory Mapping.

06

Identity & Access Management

- Identity Governance & Lifecycle
- Access Models (RBAC, ABAC, Least Privilege)
- Authentication & Multi-Factor Authentication
- Single Sign-On (SSO) & Federation
- Privileged Access Management (PAM)
- Access Reviews & Certification

Practical: Design IAM Framework & Conduct Access Review.

07

Security Architecture & Engineering

- Secure Architecture Principles & Models
- Zero Trust Architecture & Segmentation
- Cryptography, PKI & Key Management
- Secure System Design & Hardening
- Cloud, IoT, OT & Virtualization Security
- Resilience, Scalability & High Availability

Practical: Design Secure Architecture & Encryption Strategy.

08

Security Operations & Monitoring

- SOC Operations & Monitoring
- Logging, SIEM & Threat Detection
- Vulnerability Management & Patch Mgmt
- Threat Intelligence & Hunting
- Physical Security & Environmental Controls
- Compliance Monitoring & Reporting

Practical: Configure Monitoring Workflow & Conduct Threat Analysis.

This curriculum is mapped to the latest ISC2 CBK and designed to build leadership, strategic thinking, and practical expertise for today's information security professionals.
