ABOUT COURSE

ISO 27001:2022 Lead Auditor Certification

The ISO 27001:2022 Lead Auditor Program prepares candidates to audit Information Security Management Systems (ISMS) aligned with the latest ISO/IEC 27001:2022 standard. This comprehensive course focuses on audit planning, risk management, control validation, and compliance reporting with hands-on practical experience.

This program equips candidates with the knowledge and skills to conduct independent ISMS audits, manage audit evidence collection, identify nonconformities, and prepare professional audit reports. You will gain expertise in ISMS principles, PDCA cycle, Annex A controls, and complete audit execution methodologies through real-world simulations.

With a curriculum spanning ISMS fundamentals, risk assessment, control implementation, audit planning, audit execution, and reporting, this is the most comprehensive ISO 27001:2022 Lead Auditor prep available — covering every aspect that auditors must master.

ISO 27001:2022 Audit Scope Coverage

CyberHunt
